

# Petal Baskets

Here is a new free template for members! This makes a lovely card basket which you can use for lots of occasions. You can find this template on the free stuff pages.

Add some paper flowers to make a lovely Mother's Day basket or some yummy Easter Eggs or other treats. The template includes baskets in three sizes with handles.

Print out the template direct to card for ease, cutting on the lines and folding on the dotted lines.

*You can also print the template to paper and then glue to your card (pattern side up) before cutting out. This is actually the way I make all my demos. If you want to paper your basket as well, you can then glue your paper to the reverse side of the card and then cut around the template. The template will show on the inside when you fold up your basket but that is ok, since you will be filling your basket with goodies!*

Fold up and glue the tabs to the inside of each petal

Add a handle and decorate!

Enjoy!

Please leave us a comment below. If there are any templates you would like to see, please list them below too. I've got another basket template coming up, so stop by again soon!
