

Pyramid Box

Here is another free template for you, as part of our Christmas Countdown Series, which features projects using all of our templates, freebies or otherwise. We already have a pyramid box on the Free Stuff pages but this one is a little bit different. The pyramid frame sits on the base, which is fixed in place to hide the contents, or you can tie up the box with ribbon, like the example above.

You can see how the box works in the photo above. I've glued my template to the reverse of some pretty paper, cut it out and scored along the lines. The two pieces together with glue or double sided tape, using the tabs provided. You can see how it should look below.

Next, cut out and fold the base piece as shown below.

The top piece slots over the base piece and fixed with glue, tape or a ribbon around the whole box.

Here are some more, using a smaller size and with ribbon attached so they can be hung on the Christmas Tree.

Decorate with gems, trims and beads!

Thanks for reading. Join us for another project soon.
