

## Easter Baskets and Eggs

Here is the new 3D chipboard basket and eggs template. Both of these 3D shapes can be filled with mini eggs and make a lovely little gift for children.

The baskets and fillable eggs come in three different sizes, which gives plenty of scope for all your Easter projects. The chipboard can easily be decorated with papers and paints. The Easter Backing Papers set has basket weave papers and gingham patterns to use with this project.

Just glue the pieces together following the instructions and leave to dry before painting with acrylic paints. Then you can use papers to cover them. The gingham patterns used above have been cut slightly smaller than the chipboard to give a nice border around the outside.

Stuff the baskets with raffia or cotton wool and load them up with eggs. The basket frills are simply a scalloped edging punch and the mini tags come from the Easter Card Template Kit but you can get all the trimmings from the Free Templates page.
