

Super Quick Gift Tags

If you like things quick and easy, it doesn't get easier or quicker than these gift tags.

Using simple [5cm folded cream card](#), with some embellishments, everyone will think you have worked hard to make them and be very impressed, when they have only taken you a minute to make. I like to sit down and make up a big batch and put them in a box, ready to use when I need them, closer to Christmas.

The [gingerbread people](#) are die cuts and I've just embellished them with some glitter glue and added detailing with a black pen. Some dots of gold liquid pearls around the square, jazz things up a bit. These are all opening cards, so I've put strips of double sided tape on the backs, to make them easier to attach to the presents. Here are some more.

These [festive wooden shapes](#) are all self-adhesive, so you don't even have to glue them onto the card. They even have glitter on them, so they take literally seconds to make and will definitely brighten up a child's gift.

Here are some using [glitter trees](#) and some using the polymer clay candy canes, gingerbread men and 1.7 inch scallop circle punchies and embellished with glitter glue.

You can get everything to make these from the [webstore](#), including embellishments, as well as scallop circles, squares and mini cards!
Happy Crafting!
